

# Birregurra Primary School SunSmart Policy

## Purpose

The purpose of this policy is to encourage behaviours at Birregurra Primary School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

## Scope

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

## Policy

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours.

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the SunSmart widget on the school's website, the free SunSmart app, or at [sunsmart.com.au](http://sunsmart.com.au) or [bom.gov.au](http://bom.gov.au).

Birregurra Primary School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

### Shade

Birregurra Primary School **will** provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- where students congregate for lunch

- outdoor lesson areas
- popular play areas
- assembly areas

When building works or grounds maintenance is conducted at Birregurra Primary School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

### **Sun protective uniform/clothing**

Birregurra Primary School's school uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts
- rash vests or t-shirts for outdoor swimming activities.

From mid-August (exact date to be set by the school annually) to 30 April, all students **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of the August to April time period, by parent or student choice.

Students are required to wear a school hat (broad-brimmed or bucket) that protects the face, neck and ears when outdoors. Students who are not wearing appropriate protective clothing or a hat may be asked to play in the shade or in a suitable area protected from the sun.

### **Sunscreen**

Birregurra Primary School encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours according to [manufacturer's instructions](#).

Birregurra Primary School has strategies in place to remind students to apply sunscreen before going outdoors for example reminder notices and sunscreen monitors.

At Birregurra Primary School students are able to access sunscreen in their classrooms. Staff and students who may suffer from allergic reactions from certain types of sunscreen are encouraged to apply sunscreen at home and bring their own sunscreen to use at school.

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

### **Curriculum**

Students at our school are encouraged to make healthy choices and are supported to understand the benefits and risks of sun exposure. Birregurra Primary School will address sun and UV safety education as part of Physical Education and Health programs.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

## *Communication*

This policy will be communicated to our school community in the following ways:

- Available publicly on our school's website

- Included in staff induction processes
- Included in staff handbook/manual
- Included in transition and enrolment packs
- Discussed at parent information nights/sessions
- Reminders in our school newsletter
- Hard copy available from school administration upon request
